MANAGEMENT OF MATERNAL SHOCK 30

MODULE 12: 31

MANAGEMENT OF PRE-ECLAMPSIA/ECLAMPSIA..... 31

MODULE 13: 32

IMMEDIATE NEONATAL RESUSCITATION 32

INTRODUCTION

This is a logbook for mentees to log in the skills lab practicums performed under the mentorship of the mentor. **This will be required for certification.**

Pass mark for competency is 85%.

The checklists are in the mentee manual.

Core competencies: Using acquired knowledge, developed skills and attitudes, the mentee under the mentorship of the mentor should be able to safely and accurately perform all the EmONC skills in the EmONC training and mentorship package.

Mentorship process

A mentor is a person, friend or professional who voluntarily agrees to guide a less experienced/less knowledgeable person (mentee) to develop skills, competencies, or goals. An effective mentor understands that his or her role is to be dependable, engaged, authentic, tuned into the needs of the mentee, and offer honest and constructive feedback.

Roles of a mentor

- Shares knowledge of patient care and acts as a positive role model
- Familiarizes with the mentee's personal objectives, goals, and mentorship documentation
- Identifies specific learning opportunities and understands that the learning experience is a planned process
- Observe mentees practicing skills under the appropriate level of supervision
- Provides time for reflection, feedback, monitoring, and documenting of a mentee's progress
- Assesses competence and patient safety, in keeping with the assessment documentation
- Gives mentees constructive feedback, with suggestions on how to make improvements to promote progress
- Report any unexpected incidents or concerns to the lead mentor
- Champions respectful maternity care and patient rights throughout the mentorship cycle

A mentee is a dedicated skilled health provider who seeks to grow and develop personally and professionally to successfully achieve his/her goals with the support of a mentor

Roles of the Mentee

- Willing and available to participate and take up responsibilities
- Ensures that their objectives are met and seek for clarifications where necessary
- Completes baseline and midline evaluation tools which help to measure impact of the program
- Inquisitive and eager to learn
- Accepts criticism and learn from mistakes
- Flexible and courageous to explore new ideas and approaches
- Open, honest, and respectful
- Cooperative and committed

Learning goals

The mentor and mentee shall agree on the learning goals and define the content and process of the relationship. This will include establishing ground rules and creating a shared understanding of assumptions, expectations, goals, and needs.

Other tasks will include:

- Agree when and how to meet (recommended weekly 6 hours)
- Responsibilities
- Criteria for success
- Accountability
- Discuss confidentiality, boundaries, and limits

Assessing progress towards learning goals

- The mentor and mentee will assess the progress of the mentorship meetings by completing the mentorship session Log at the end of every session/week
- The mentorship session Log will help both the mentor and mentee keep a record of sessions attended
- The mentorship log will help both the mentor and mentee to keep track of the areas covered, review the action plan for the previous week, and prepare another plan for the next session

Mentorship Timelines

Timeline for closure is **6 months**

CERTIFICATION

For each of the following competency skills, the mentee is required to **score a minimum of 85% to be certified.**

Module 1: Ante Partum Hemorrhage

Module 2: Partograph use and interpretation

Module 3: Obstructed Labour

Module 4: Active management of the third stage of labor (AMSTL)

Module 5: Management of postpartum hemorrhage (PPH)

Track 1: Bimanual compression of the uterus

Track 2: Compression of abdominal aorta

Track 3: Removal of retained placenta

Track 4: Uterine Inversion

Track 5a: The placement of the intrauterine balloon tamponade (condom tamponade)

Track 5b: The placement of the intrauterine balloon tamponade (Free flow system)

Track 6: Repair of perineal tear

Track 7: Repair of cervical tear

Track 8: The placement of the b-lynch suture

Track 9: Placement of non-pneumatic anti-shock garment (NASG)

Track 10: Post-partum hemorrhage simulation

Module 6: Management of cord prolapse

Module 7: Vaginal breech delivery

Module 8: Shoulder dystocia delivery

Module 9: Vacuum assisted vaginal delivery

Module 10: Maternal resuscitation

Module 11: Management of maternal shock

Module 12: Management of pre-eclampsia/eclampsia

Module 13: Immediate neonatal resuscitation

STEPS OF CERTIFICATION

Mentor selects and orients the mentee on the mentorship program

Training and mentorship by the mentor

Assessment by the mentor

Mentee scores $\geq 85\%$ for each skill

Mentee completes all the topics/skills

Mentor approves mentee for certification

Certification by DRMH

MODULE 5:

MANAGEMENT OF POSTPARTUM HEMORRHAGE (PPH)

This module has 10 tracks:

- Track 1: Bimanual compression of the uterus
- Track 2: Compression of abdominal aorta
- Track 3: Removal of retained placenta
- Track 4: Uterine Inversion
- Track 5a: The placement of the intrauterine balloon tamponade (condom tamponade)
- Track 5b: The placement of the intrauterine balloon tamponade (Free flow system)
- Track 6: Repair of perineal tear
- Track 7: Repair of cervical tear
- Track 8: The placement of the b-lynch suture
- Track 9: Placement of non-pneumatic anti-shock garment (NASG)
- Track 10: Post-partum hemorrhage simulation
